

**ALL INDIA INSTITUTE OF MEDICAL SCIENCES
ANSARI NAGAR, NEW DELHI – 110 608
EXAMINATION SECTION**

IMPORTANT NOTICE NO: 68/2018 DATED 29/08/2018

PROSPECTIVE APPLICANTS ADVANCED REGISTRATION (PAAR) FACILITY

All India Institute of Medical Sciences, New Delhi has proposed to initiate online registration of applicants well in advance. Registrations will be a two-stage process comprising of a *Basic Registration* and *Final Registration* stages.

From past experience it has been found that a majority of rejections are due to improper filling of details other than educational qualifications. In the first stage applicants desirous of appearing in any of the Entrance Examinations (eg MD/MS or MDS or MBBS) in future will be able to initially register by filling basic details and uploading images almost a year in advance (*Basic Registration*). These particulars and images will be screened there would be adequate time to correct errors and deficiencies. The candidates will be informed whether their registration is accepted, and their details will be stored with a unique identification number. Thus, candidates will not be subjected to the pressures of last minute rush and the fear of rejection of applications without any time left to make amends. *Basic Registration* process is free of any charges and thus no payment shall be collected at this stage. Since applicants may not have completed their eligibility examinations etc., certain details may not be collected at the time of *Basic Registration*.

At a specified time prior to the entrance examination for a session (e.g. January 2019 session for MD/MS or MDS or MBBS 2019 session) the *Basic Registration* process will be closed and no further applications for that particular session will be allowed. The Prospectus and list of tentative seats will be uploaded at this time since the correct position will be known only after a session has started and seat allocation processes are closed. The applicants who have completed Basic Registration and this has been *accepted* can thus decide to either appear for the examination at this session or subsequently. In case any applicant does not wish to appear, he /she need not proceed to the next stage and the Basic Registration details will be stored and will be valid for subsequent sessions. In case the applicant desires to take the examination as announced, he / she can proceed for *Final Registration*. *Please note that rejected Basic Registration applicants are not eligible for proceeding to this stage.* In *Final Registration* applicants can fill remaining details such as like qualification details, choose the available city for examinations and make the necessary payments. These applicants will be eligible to be issued Admit Cards for that examination subject to fulfilment of eligibility criteria as mentioned in the respective prospectus.

The registration process will then resume and continue for subsequent sessions (e.g. after Final Registration for MD/MS/MDS January 2019 session the Basic Registration for MD /MS or MDS July 2019 session onwards and MBBS 2020 session will resume). Those who have already completed Basic Registration earlier need not fill these details again whether they have appeared for the MD/MS/MDS Entrance Examination of January 2019 session. However, every time the dates for Final Registration for subsequent Entrance Examinations are made, the Final Registration will have to be completed. Thus, while *Basic Registration* is enduring, *Final Registration* is examination session specific.

Thus, all prospective candidates will have the facility of ensuring their basic registration details are completed and accepted in all respects, well in advance. It would also ensure that only those applications that are complete in all respects and accepted at the Basic Registration stage are permitted to make the Final Registration including payment. Basic Registration details need not be filled, and images need not be uploaded repeatedly.

This Prospective Applicants Advanced Registration (PAAR) facility is being initiated for the Postgraduate Medical & Dental Entrance Examinations for the January 2019 session onwards and will be extended shortly to the MBBS Entrance Examination and other examinations subsequently. For details please visit www.aiims exams.org from time to time.
